

Unique Software
Products and Services

Customised and Integrated
to streamline your business
processes

Our Philosophy

Software functions as a platform and interface between input and critical processes. It must be optimised, properly designed, up to date and fully integrated with existing systems to enable proper functionality. We offer our clients risk free analysis, reliable and proven software development and more effective critical server and data management services. Our Full Enterprise solutions are tried, tested and proven in all industries across Southern Africa.

Introduction

At Eclipse Technologies we exceed our clients expectations through understanding software dynamics and business process priorities.

Software and IT systems must provide accurate and relevant information, and produce the correct output information to enable appropriate business functions to run quickly and effectively. We understand these dynamics and have completed many successful projects across a wide range of industries in Southern Africa.

Dating back to 2007 Eclipse has the specialist skills and breadth of view to devise and develop an integrated and seamless software or IT solution for your company. With the right expertise, experience and knowledge, Eclipse Technologies is the intelligent choice.

We are completely focused on providing exceptional software development, software management, software support, website creation, consultation and help desk outsourcing services. The combination of excellent products and world class software development skills enable us to offer clients the appropriate solutions, with either off the shelf products or fully customised solutions designed and created to meet your exact business requirements.

On all our projects we adopt a totally "flexible" project management methodology which assists us in providing both structure and the ability to adjust focus as your business needs change.

Our aim is to secure loyal customers by always delivering exactly what our clients want, and by ensuring what we have created and installed provides a solution that is professional, of an exceptional high standard and works precisely to specification.

Our optimum service products are capable of providing management support, technical support, and internal procedure and operational system support.

At Eclipse Technologies our drive to provide exceptional client service levels can only be delivered by a dedicated team. We operate in a fast and dynamic environment and totally rely on people who are skilled and innovative.

We believe that our people are our company's strength. Their knowledge, experience and commitment is key to our success.

Our commitment

Our Ethos,

The client is central to every company's success, each strategy we implement is to ensure that our clients remain the main focus of our business. This perspective is driven by our capabilities and extensive experience. To enable us to provide clear solutions we as a company need to engage, acquire and nurture our clients in a ever-changing fast moving environment.

What we have achieved

Eclipse Technologies has extensive experience, with numerous successful software installations completed within various industries.

We stand tall and proud of our software systems and support services.

Eclipse Technologies has always adopted an "Industry Best Practice" ethos throughout our company, through which, by working with various leading companies we have enhanced and developed our capabilities to world class standards.

Our vision

Eclipse Technologies is inspired by what can be created and implemented now to push a company forward to penetrate new markets, improve operational systems, increase profits and improve accountability and reportability.

We aim to be the preferred choice when companies seek to upgrade, install or manage new or existing software. We foresee companies making more use of customised software and integrating new software into older systems to make processes more efficient and cost effective.

Our Mission

To maintain our industry track record for exceptional software design, expert installation and supplier of quality ancillary services. Eclipse Technologies is also well known as a premier consultancy and project management company, a position we will continue to hold on to while continuously optimising our client businesses through our world-class software and IT solutions.

Our values

Our business values are the core of our business ideology. They bind us and we use them to guide our business to success. We commit that in our dealings with customers, suppliers and partners, we will always reflect our values.

- Being innovative
- Achieving high levels of performance and service
- Committed to the ethical and responsible conduct
